

MESOTHERAPY

Infusion of actives and neurotoxins

Our bespoke S.tep gold-plated titanium microneedles deliver a synergy of a neuromodulator, hyaluronic acid, peptides, and nutrients deep into the skin. The formula is enriched with a selection of active ingredients, omega 3, and vitamin E. Imagine hundreds of micro-IVs for your skin to promote collagen production, elastin synthesis and more, with no downtime.

A more medically advanced mesotherapy procedure includes small doses of superficial neurotoxins.

Mesotherapy plumps fine lines, reduces wrinkles, and promotes hydration for a smooth and healthy complexion. It is safe for crepey skin, lines under the eyes and around the mouth. It also helps to reduce blemishes, sun damage, age spots, and acne scars for brighter and even skin tone.

A minimally invasive and fully customized aesthetic procedures.

IDEAL FOR:

- Collagen loss
- Fine lines
- Loose skin
- Hyperpigmentation
- Blemishes
- Thin dull hair
