

REGEN MED PROGRAM

POWERED BY YOUR OWN CELLS

We are at the forefront of an anti-aging revolution powered by your own hair follicles. For the first time in medical history, personalized regenerative medicine allows us to harness the power of your own stem cells to repair, recover, and renew your body.

As we age, our cells become less effective. By preserving your cells today, you can lock in your youth for tomorrow.

Live cell preservation is your biological insurance policy.

THREE COMPREHENSIVE PHASES

Introducing non-invasive hair follicle collection to protect the future health of you and your family, including your children.

1

COLLECTING CRITICAL CELLS

Harness the power of your hair stems cells.

2

PREPARING THE CANVAS

Exfoliate, stimulate and enhance your skin and scalp.

3

YOUR SECRETOME TREATMENT

Enjoy your cells' transformative benefits.

HOW IT WORKS

PHASE 1

COLLECTING CRITICAL CELLS

A trained technician non-invasively harvests hair follicles to collect stem cells. The vitality and potential of your youngest and healthiest cells are cryogenically preserved.

Plus, DNA test insights are obtained to create a custom treatment plan addressing your body's needs.

- Nutrient deficiencies
- Skin barrier health
- Skin aging factors
- Connective tissue strength

PHASE 2

PREPARING THE CANVAS

Optimize your skin and scalp health for optimal results.

STEP 1: Personalized hydradermabrasion treatments to exfoliate, stimulate healing factors of your skin and scalp.

STEP 2: AI-driven skin analysis, to customize nutrient-rich serums to nourish from the outside in.

STEP 3: Genetics insights to tailor a supplement protocol to repair, recover, and renew from the inside out.

PHASE 3

YOUR SECRETOME TREATMENT

Experience the transformative benefits of your own stem cell-derived serum for your skin and scalp.

STEP 1: Receive your tailored secretome treatment filled with powerful healing, growth, and anti-aging factors, over six monthly microneedling sessions.

STEP 2: Continue your custom at-home skin care regimen.

STEP 3: Continue your tailored supplement plan.
